Canadian Data Report of Fisheries and Aquatic Sciences No. 530

86-04999/

Canadian Data Report of Fisheries and Aquatic Sciences

Data reports provide a medium for filing and archiving data compilations where little or no analysis is included. Such compilations commonly will have been prepared in support of other journal publications or reports. The subject matter of data reports reflects the broad interests and policies of the Department of Fisheries and Oceans, namely, fisheries and aquatic sciences.

Data reports are not intended for general distribution and the contents must not be referred to in other publications without prior written authorization from the issuing establishment. The correct citation appears above the abstract of each report. Data reports are abstracted in *Aquatic Sciences and Fisheries Abstracts* and indexed in the Department's annual index to scientific and technical publications.

Numbers 1 25 in this series were issued as Fisheries and Marine Service Data Records. Numbers 26 160 were issued as Department of Fisheries and the Environment, Fisheries and Marine Service Data Reports. The current series name was introduced with the publication of report number 161.

Data reports are produced regionally but are numbered nationally. Requests for individual reports will be filled by the issuing establishment listed on the front cover and title page. Out-of-stock reports will be supplied for a fee by commercial agents.

Rapport statistique canadien des sciences halieutiques et aquatiques

Les rapports statistiques servent à classer et à archiver les compilations de données pour lesquelles il y a peu ou point d'analyse. Ces compilations auront d'ordinaire été préparées à l'appui d'autres publications ou rapports. Les sujets des rapports statistiques reflètent la vaste gamme des intérêts et des politiques du ministère des Pêches et des Océans, c'est-à-dire les sciences halieutiques et aquatiques.

Les rapports statistiques ne sont pas destinés à une vaste distribution et leur contenu ne doit pas être mentionné dans une publication sans autorisation écrite préalable de l'établissement auteur. Le titre exact paraît au-dessus du résumé de chaque rapport. Les rapports statistiques sont résumés dans la revue *Résumés des sciences aquatiques et halieutiques*, et ils sont classés dans l'index annuel des publications scientifiques et techniques du Ministère.

Les numéros 1 à 25 de cette série ont été publiés à titre de relevés statistiques, Services des pêches et de la mer. Les numéros 26 à 160 ont été publiés à titre de rapports statistiques du Service des pêches et de la mer, ministère des Pêches et de l'Environnement. Le nom actuel de la série a été établi lors de la parution du numéro 161.

Les rapports statistiques sont produits à l'échelon régional, mais numérotés à l'échelon national. Les demandes de rapports seront satisfaites par l'établissement auteur dont le nom figure sur la couverture et la page du titre. Les rapports épuisés seront fournis contre rétribution par des agents commerciaux.

Errata

(1) Abstract, page v. The first sentence should read "The Maritime Provinces Atlantic salmon sport catch in 1984 was 22,837 large salmon and grilse," not "39,584".

(2) When referring to the ten Nova Scotia data tables, which begin on page 30, the "Obs. No." columns should be utilized, not the "Estimated No." columns.

Estimates are not entirely correct, due to a rounding error which corrupts the estimates in Nova Scotia data Tables 1 through 8 (pages 30-40). Estimates in Nova Scotia data Tables 9 and 10 (pages 41-91) are incorrect due to a calculation error.

Although estimates are inaccurate, over 90% of angler cards were received. Consequently, less than ten percent of the catch and effort information is missing in the "Observed" values.

ABSTRACT

O'Neil, S.F., M. Bernard and J. Singer. 1985. 1984 Atlantic salmon sport catch statistics, Maritime Provinces (Redbook). Can. Data Rep. Fish. Aquat. Sci. No. 530. v + 98 p.

The Maritime Provinces Atlantic salmon sport catch in 1984 was 39,584 large salmon and grilse. Field staff estimated that 31 New Brunswick rivers produced 15,038 bright fish (grilse) and 1,709 kelts. Nova Scotia anglers reported fishing on 93 rivers to catch 6,083 large salmon and grilse. Only seven grilse were angled on Prince Edward Island. Anglers spent 74,248 rod-days on New Brunswick rivers and 55,225 on Nova Scotia rivers during the 1984 season. Catch per unit effort (fish per rod-day) for the Maritimes was 0.304, double the previous years success rate.

Keywords: Atlantic salmon, sport catch, rod-days, kelts, grilse, New Brunswick, Nova Scotia, Maritimes.

RÉSUMÉ

O'Neil, S.F., M. Bernard and J. Singer. 1985. 1984 Atlantic salmon sport catch statistics, Maritime Provinces (Redbook). Can. Data Rep. Fish. Aquat. Sci. No. 530. v + 98 p.

Les prises sportives de saumon de l'Atlantique effectuées dans les provinces Maritimes en 1984 s'établissent à 39 584 gros saumons et madeleineaux. Les employés des régions concernées ont estimé à 15 038 madeleineaux et à 1 709 charognards les prises obtenues dans 31 rivières du Nouveau-Brunswick. En Nouvelle-Écosse, les prises obtenues dans 93 rivières sont évaluées à 6 083 gros saumons et madeleineaux. Le nombre de jours consacrés à la pêche au cours de la saison 1984 s'établit à 74 248 pour le Nouveau-Brunswick et à 55 225 pour la Nouvelle-Écosse. La prise par effort unitaire (poissons par journée de pêche) pour les Maritimes a été de 0.304, soit le double du résultat obtenu l'année précédente.

INTRODUCTION

This report provides Maritimes-wide catch and effort statistics for the 1984 Atlantic salmon sport fishery. Earlier reports, published from 1970-83, as the "Redbook" series, have been discontinued with the preparation of this data report. It is intended to replace the earlier series and to conform to Fisheries and Oceans internal report series publication guidelines.

In addition to the change in document series, the statistics provided in this report have been presented in an entirely new format. Data on New Brunswick and Prince Edward Island rivers are listed separately and in a format distinct from those on Nova Scotia rivers.

The data incorporated in the tables dealing with New Brunswick and Prince Edward Island were provided by Fisheries and Oceans field officers for most rivers and by New Brunswick Department of Natural Resources regional biologists for the main stem of the Saint John River and the Nashwaak.

The angling data for Nova Scotia rivers was provided by Atlantic salmon sport fishermen via their license stubs. Over 90% of Nova Scotia anglers completed catch and effort reports, which were collectively utilized to generate the summary information in this report.

A summary of recent Atlantic salmon catches in Canada, by province, is provided in Table 1.

MARITIME PROVINCES

The 1984 Atlantic salmon sport catch was unique - large salmon had to be released. In New Brunswick, all bright salmon greater than 63 cm (24.8 in.) in length had to be returned to the water alive, and in Nova Scotia the same regulation became law on August 8, 1984. Catch figures do not include estimates of released fish unless otherwise specified. Comparison of catch data with previous years is therefore inappropriate as the large-salmon component of the catch figures is incomplete (Tables 2 and 3).

The 1984 Maritime Provinces Atlantic salmon angling catch was 22,837 large salmon and grilse (Table 2). New Brunswick, Nova Scotia and Prince Edward Island contributed 73%, 27% and less than 1% of the total catch, respectively.

Total effort fell to 130,156 rod-days from 161,000 in 1983 and 183,000 in 1982. In contrast, the number of rivers on which there was a reported catch or effort rose to 126 from the 99 of 1983. Catch per unit effort or fish per rod-day rose to 0.176 from 0.151 in 1983. However, since released large salmon were not included in the CPUE calculation, it is reasonable to assume that a much higher CPUE would more closely approximate the true 1984 success rate.

The two Maritime Regions, Scotia-Fundy and Gulf, accounted for 8,771 and 14,066 fish, respectively (Table 4).

New Brunswick

New Brunswick rivers are listed alphabetically in the first section of this report. The data for each river include the numbers and weights of kelt and bright large salmon and grilse by month, effort in rod-days, and the catch per rod-day. A kelt or "black-salmon" is a salmon in the spent or spawned-out condition prior to its re-entry into salt water (Allan and Ritter 1977) and a bright fish is a maturing salmon that has spent at least several months at sea.

The data for each river are broken down by kelt and bright fish, where appropriate. Because the original reports of catch and effort are made by month, there is only a single effort estimate for those months where there is both a kelt and bright catch (usually May). The reported effort for that month is therefore duplicated in the data section of this report, once for kelts and once for bright fish. It is inappropriate in such cases to sum rod-days for kelt and bright fish for an annual total, as an overestimate will result.

Fisheries and Oceans field staff provided estimates of catch and effort on most New Brunswick rivers. The convention employed for the classification of kelts as either large salmon or grilse is weight. Salmon weighing over 2.27 kg (5 pounds) are classed as large salmon and those 2.27 kg and under as grilse. Anglers are expected to identify a large salmon by length - fish greater than 63 cm must be released.

No large salmon catch data are included in the statistical section of this report for New Brunswick rivers. Several estimates of numbers of large salmon released were provided by Fishery Officers (Table 5), but for the most rivers estimates were unavailable.

Catch and effort data were not available for the Middle, Tetagouche and Tracadie rivers, although it is understood

TABLE 5. Estimates of large salmon released by anglers on several New Brunswick rivers in 1984.[1]

River	Number
Bartibog	61
Little Southwest Miramichi	397
Northwest Miramichi	637
Sevogle	95
Kedgwick	154
Patapedia	25
Restigouche	1,132
Upsalquitch	346
Nashwaak	221

[1]Estimates of released fish not available on other New Brunswick rivers.

that some effort occurred.

Open season dates for 1984 are given in Table 6. Variation orders or fishing prohibitions are not listed with the data but are summarized in Table 7.

The 1984 recreational salmon catch in New Brunswick was 16,747 large salmon and grilse. The kelt fishery accounted for 1,709 fish; and bright grilse accounted for the balance, 15,038. Total catch was roughly equivalent to that of the previous year in spite of the mandatory release of large slamon. Thirty-one rivers collectively produced the catch. "Bright lights" during the 1984 season appear to have been tributaries of the Miramichi system. The Sevogle, Northwest Miramichi, and Dungarvon exhibited catches per rod-day of 0.873, 0.614, and 0.542, respectively.

TABLE 6. Open Season Dates, New Brunswick and Prince Edward Island Rivers, 1984

Upsalquitch	No kelt fishery	Jun 15 - Aug 31

TABLE 7. New Brunswick Variation Orders and Fishing Prohibitions, 1984

Alma River	Closed to angling in those waters downstream from Lake Brook to the mouth of the river from September 13-16, 1984.
Bartholomew River	Closed to all fishing in 1984.
Bartibog River	Closed to angling in those waters upstream from the No. 11 Highway Bridge from April 15 to ay 13, 1984.
Big Salmon River	(1) Closed to angling in those waters in Saint John and Kings Counties from 12 o'clock noon local time August 22-September 16, 1984. (2) Season extended from October 15 to October 30, 1984, in those waters of the Big Salmon river from, but not including, the Cat Pool to the mouth of the river.
Hammond River	Closed to angling in Palmer Brook from its confluence with the Hammond River upstream 200m to a point as marked by a fishery officer from July 28 to the remainder of the year.
Nashwaak River	(1) Closed to angling in those waters known as Big Basin Pool, and lying between a sign placed by a fishery officer at the downstream end of the Pool and sign placed by a fishery officer at the upstream end of the Pool from June 21, 1984, to the remainder of the year. (2) Closed to angling in those waters upstream from its confluence with the Saint John river from September 7 - October 4, 1984.
Nepisiguit River	(1) Closed to angling in those waters from the head of Pabineau Falls Pool downstream for a distance of 45m to a point as marked by a fishery officer from June 1, 1984, to the remainder of the year. (2) Closed to angling in those waters from 100m above to 100m below the Nepisiguit Trap Counting Fence from May 31, 1984 to the remainder of the year.
Point Wolfe River	Closed to angling in 1984.
Saint John River	Closed to angling in those waters in Carleton County lying between the highway bridge at Grafton and the railroad bridge at Upper Woodstock from August 21, 1984 to the remainder of the year.
Southwest Miramichi River	(1) Closed to angling in those waters from the mouth of Indiantown Brook, downstream for a distance of 200 yards below the Quarryville Bridge to a point as marked by a fishery officer from July 31, 1984, to the remainder of the year. (2) Closed to angling in those waters lying between the No. 8 Highway Bridge and the Canadian National Railway Bridge at Doaktown, Northumberland County from August 17, 1984 to the remainder of the year.

Nova Scotia

The 1984 Atlantic salmon angling data for Nova Scotia was based on 5,168 catch and effort reports supplied by anglers.

Eleven summary tables, which will be referred to as Nova Scotia data tables, have been compiled from the data for this report. They include catch data by river county and salmon management zones as well as catch with effort data for similar groupings. A distinction is made between fish released versus retained (killed) in all tables. The catch by river table, (Nova Scotia data table 1), provides an alphabetical listing of rivers with associated data such as the number of anglers who reported fishing the river and the actual and estimated number of salmon and grilse retained or released. Angling season dates are included, by river, in Nova Scotia data tables 1, 5, 9 and 10. Special seasons or variation orders are listed in Table 8.

Catch per unit effort calculations include retained and released fish (Nova Scotia data table 5).

The Nova Scotia data tables 9 and 10 provide weekly and monthly summaries of catch, respectively.

Each catch and catch/effort table includes "Observed" as well as "Estimated" catch and effort. Observed values are sums of actual data reported by anglers. Estimated values are arrived at through a procedure whereby actual data is extrapolated to account for anglers who failed to report their catch and effort. The procedure employed for calculation of estimates is intended to account for "response bias" and is detailed in Appendix 2.

The Cheticamp River is managed under Parks Canada regulations which do not require that anglers have a Provincial fishing license. Consequently, a complete data summary for the Cheticamp will not be found in our Nova Scotia data tables but in Table 9.

The Nova Scotia Atlantic salmon sport catch for 1984 was 6,083 retained large salmon nd grilse. Anglers released 863 grilse and 1,540 large salmon in 1984, for an overall catch figure of 8,486 fish.

The retained catch was down somewhat from recent years (Table 2) but license sales also experienced a drop from nearly 7,600 in 1983 to 5,787 in 1984.

The number of residents and non-residents licenced to fish in Nova Scotia in 1984, was 5,029 and 758, respectively (Nova Scotia data summary table, page 29).

The apparent best angler success rates, measured as number of fish per rod-day, generally occurred on rivers which received relatively little attention. For example, only two anglers reported fishing on the Ingonish River, but their catch per rod-day was 0.552. River Phillip, on the other hand, was fished extensively but still managed to produce enough fish during the short autumn run to yield a catch per rod-day of 0.295.

Salmon management zone summaries indicate that the largest catches were made in southwest Nova Scotia (Zone 9), but the greatest success rate was realized in Zone 7 on the eastern shore (Nova Scotia data tables 4 and 8; Appendix 3).

TABLE 8. Nova Scotia Variation Orders, Fishing Prohibitions and Special Seasons, 1984

Cheticamp River	Season regulated by Parks Canada: May 19 - September 30, 1984. Refer to page 8 for catch and effort data.
Clyde River	Reopened to angling from September 15 - October 15, 1984, below Quinns Falls.
Gold River	Closed to fishing in that portion of the river known locally as the "Dipping Pool", located between the "Cable Pool" and the "Kill Devil Pool", as marked by a fishery officer from July 13-31, 1984.
Grand River	(1) Closed to fishing between those points as marked by a fishery officer being approximately 90m upstream and 90m downstream from Grand River Falls from May 10 - October 15, 1984. (2) Closed to fishing downstream from Morrisons Bridge from August 3-14, 1984.
Kirby River	Closed to fishing in those waters 50 feet downstream and 50 feet upstream from the #430 Highway Bridge at Sheet Harbour Passage from June 15 - September 30, 1984.
LaHave River	(1) Closed to fishing in the pool located immediately below Morgan Falls Fishway, as marked by a fishery officer, from May 1, 1984, to the remainder of the year. (2) Reopened to angling from September 19 - October 15, 1984, in those waters of the main branch downstream from the confluence of Indian Brook with the said river but not including tributaries to the said river.
Margaree River	(1) Those waters except upstream from the Big Intervale Bridges: Season- June 1 - October 15, 1984. (2) Those waters upstream from the Big Intervale Bridges: Closed all year.
Medway River	(1) Closed to fishing in that portion from a location marked by a fishery officer above the Westfield Highway Bridge, upstream to the foot of McGowan Lake from May 24, 1984, to the remainder of the year. (2) Closed to salmon angling in that portion upstream from the foot of McGowan Lake, including all branches and tributaries, from May 24, 1984, to the remainder of the year.
Mersey River	Reopened to angling from September 15 - October 15, 1984, below Cowie Falls.
North River (Victoria Co.)	(1) Closed to fishing upstream from Carey's Rock from August 1, 1984, to the remainder of the year. (2) Closed to fishing downstream from Carey's Rock from August 3-14, 1984.
Petite Rivière	Closed to fishing below Hebb Lake, but not including Fancy Lake from July 16-31, 1984.
St. Mary's River	(1) Those waters downstream from a point 100m upstream of Silver's Bridge and downstream from the highway bridge at Glenelg: Season - May 18 - August 15, 1984.

TABLE 8. (continued)

	(2) East River, St. Mary's, upstream from a point 100m upstream of Silver's Bridge: Season - May 18 - July 31, 1984.
	(3) West River, St. Mary's upstream from the highway bridge at Glenelg: Season - June 1 - July 31, 1984.
Tusket River	Closed to fishing from the highway bridge at the southern extremity of Lake Vaughn downstream to the Tusket River Hydro Station from April 5 - June 30, 1984.
West River (Sheet Harbour)	Closed to fishing in those waters upstream from the Killag Road Bridge to its source, and including all tributaries from June 15 - September 30, 1984.

TABLE 9. Number of salmon and grilse angled on Cheticamp river, 1984.

NOVA SCOTIA

N.S. SALMON SPORTSFISHING SUMMARY 1984

No. of licenses issued for year: 5787
No. of license stubs received: 5168

	Observed	% Obs.	Est. No.
No. of resident anglers	4576	89	5123
No. of non-resident anglers	592	11	663
Anglers who did not fish	977	19	1093
Anglers who fished unsuccessfully	2184	42	2446
Anglers who fished successfully	2007	39	2246
Total anglers who fished	4191	81	4693
No. of rod days fished in season	55225		
No. of rod days fished by successful anglers	39400		
No. of rod days fished by unsuccessful anglers	15825		
Average No. of rod days per angler	13.18		
Average No. of rod days per successful angler	19.63		
Average No. of rod days per unsuccessful angler	7.25		
Average No. of rivers fished per angler	1.63		
Total fish retained	6083		
Total salmon released	1540		
Total grilse released	863		
Total fish released	2403		
Total fish retained per rod-day	.1101		
Total fish caught (retained & released) per rod-day	.1537

6. Gulf Shore Nova Scotia

Scotia-Fundy Region
3. Saint John - Fundy
5. Cape Breton - East
7. Eastern Shore
8. Upper Bay of Fundy
9. Southwestern Nova Scotia

Appendix 2

Procedure for calculating estimates in Nova Scotia data tables 1 through 11.

Angling license stubs were either sent in without prompting (Group VOL) or in response to one of three reminder letter (Groups PP1, PP2 and PP3). Inherent in mail surveys of this kind is response bias where the more successful or more active participants respond first. The less fortunate or less interested parties tend to respond at a lower rate and later (i.e., after prompting).

Extrapolation from VOL would overestimate actual catch and effort. Therefore, we prompted anglers by mail, up to three times, in an attempt to achieve a 100% response. We actually achieved an 89% response (when you eliminate spoiled angler reports), and subsequently developed the following procedure for extrapolating to 100% while still accounting for "bias".

A. Calculation of estimates for each river. (Nova Scotia data Tables 1 and 5)

(1) Regressed cumulative effort per response category (VOL, PP1, PP2, PP3) by cumulative responses per response category. Solved regression equation for total effort (Y) where X = total number of possible respondents (= 5,787 in 1984), where $Y = a + bx$.

(2) Proportioned effort for the 11% of non-respondents across all rivers according to the proportion of the effort which they had reportedly received.

(3) Regressed natural log of cumulative catch on natural log of cumulative effort per response category, for each river. Solved regression equation for total catch (Y) for X = total estimated effort from (2); i.e., $\log_e Y = a + b \log_e X$

B. Calculation of estimates for river groupings (Nova Scotia data tables 2, 3, 4, 6, 7, 8)

River catch or effort estimates from A(2) and A(3) above were summed to arrive at a total estimated catch or effort. The estimated number of salmon, grilse or "unknown size" fish was calculated by proportioning totals according to observed (reported) catches.

C. Calculation of estimates for weekly and monthly breakdowns, by river (Nova Scotia data tables 9 and 10).

Total estimated catch was proportioned, by week or month, according to observed (reported) catch by week or month.

Appendix 3

SALMON RIVERS BY MANAGEMENT ZONE

Management Zones		Rivers
Gulf Region		
1	Restigouche	Kedgwick, Restigouche, Patapedia, Upsalquitch, Charlo, Eel, Benjamin, Jacquet, Nigadoo, Millstream, Tetagouche, Middle (Gloucester Co.), Little, Nepisiguit, Bass, Caraquet, South Caraquet, Pokemouche, Little Tracadie, Tracadie.
2	Miramichi	Tabusintac, Burnt Church, Bartibog, Southwest Miramichi, Napan (Northumberland Co.), Black (Northumberland Co.), Bay du Vin, Black (Kent Co.), Kouchibouguac, Kouchibouguacis, Shediac, Richibucto, Cockpish, Buctouche, Cocagne, Scoudouc, Aboushagan, Timber, Gaspereau (Westmorland Co.), Baie Verte, Cains, Bartholomew, Dungarvon, Renous, Little Southwest Miramichi, Sevogle, Northwest Miramichi.
4	Prince Edward Island	Morell, West (Queens Co.), Midgell.
6	Gulf Shore Nova Scotia	Shinimikas, Tidnish, River Philip, Wallace, Pugwash, French, Waugh, River John, West (Pictou Co.), Middle (Pictou Co.), Barney's, East (Pictou Co.), West (Antigonish Co.), South (Antigonish Co.), Pomquet, Mabou, Margaree, Cheticamp.
Scotia-Fundy Region		
3	Saint John	Tantramar, Demoiselle Creek, Crooked Creek, Shepody, West (Albert Co.), ALma, Point Wolfe, Coverdale, Turtle Creek, Weldon Creek, Pollett, Petitcodiac, Big Salmon, Irish, Moeher (Saint John Co.), Black (Saint John Co.), Hammond, Little (Saint John Co.), Kennebecasis, Saint John, Nerepis, New, Pocologan, Magaguadavic, Digdeguash, Waweig, St. Croix, Canaan, Oromocto, Salmon (Queens Co.), Nashwaak, Keswick, Tobique, Salmon (Victoria Co.).
5	Cape Breton East	North Aspy, Ingonish, Indian Brook, Barachois, North (Victoria Co.), Baddeck, Aconi Brook, Middle (Victoria Co.), Mira, Lorraine Brook, Catalone, Gerratt Brook, Salmon (Cape Breton Co.), Gaspereau (Cape Breton Co.), Framboise, Marie Joseph, Grand, River Tillard, Inhabitants.
7	Eastern Shore Nova Scotia	Clam Harbour, Guysborough, Salmon (Guysborough Co.), Cole Harbour, Larry's, New Harbour, Isaac's Harbour, Country Harbour, Gegogan Brook, Indian, St. Mary's, Gaspereau Brook, Liscomb, Necum Teuch, Ecum Secum, Moser (Halifax Co.), Quoddy, Salmon (Port Dufferin), West (Sheet Harbour), Taylor Bay Brook, East (Sheet Harbour), Kirby, Tangier, Ship Harbour, Salmon (Halifax Co.), Musquodoboit, Chezzetcook, Three Fathom Harbour Brook, Rocky Run, Lawrencetown Lake (Salmon River), Little Salmon (Lake Major), Sackville.
8	Upper Bay of Fundy	Bear, Lequille, Paradise, Round Hill, Annapolis, Nictaux, Cornwallis, Gaspereau (Kings Co.), St. Croix (Hants Co.), Kennetcook, Shubenacadie, Stewiacke, Salmon (Colchester Co.), North (Colchester Co.), Chiganois, Debert, Folly, Great Village, Portapique, Bass (Colchester Co.), Little Bass, Economy, Harrington, Diligent, Apple, River Hebert, Maccan, Nappan (Cumberland Co.).
9	Southwest Nova Scotia	Nine Mile, Ingram, East (Lunenburg Co.), Middle (Lunenburg Co.), Gold, Martins Brook, Mushamush, LaHave, Petite Riviere, Medway, Mersey, Broad, Sable, Jordan, Roseway, Clyde, Barrington, Tusket, Salmon (Digby Co.), Sissiboo.
